

IS PLEASED TO ANNOUNCE A STRATEGIC ALLIANCE WITH **BARVISION**

WHAT IS **BARVISION**?

BarVision raises the bar for best practices for hotels serving liquor, beer, and wine.

BarVision's technology and reporting assists hotel F&B operators in serving profitable, consistent drinks at the bar, outside by the pool, on the golf course, and anywhere in between. BarVision is the only liquor monitoring solution providing insight behind the bar while managers focus on operational excellence.

WHO BENEFITS FROM **BARVISION**?

GUESTS

Guests stand to benefit as they'll receive the drinks they request and pay for, every time. Consistently delivering a quality product ensures guests leave feeling satisfied, increasing their likelihood to return and refer future guests.

BARTENDERS

By reducing or eliminating overpours, bartenders will sell more drinks, leading to bigger tabs and bigger tips. Unlike liquor control systems, BarVision allows bartenders to pour freely and has no impact on bartender speed or efficiency.

MANAGERS

Managers can provide clarity to ownership through reports on their bar's performance. It allows them to remotely monitor bartender behavior and spend more time in front of their guests, while assuring beverage consistency.

HOTEL OWNERS

Owners can realize thousands of dollars in revenue that was lost to overpouring and giveaways. The result is returns of 10x or more, along with up to 10% increases in beverage revenue.

WHY ADD BARVISION?

The benefits of BarVision extend past the guest experience and oversight capabilities into significant financial benefits. The financial results are profound with revenue increases of up to 10% of overall beverage revenue and returns of more than 10x. Thousands of dollars in revenue are within reach with BarVision's reporting.

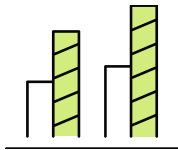

Our system can be incorporated into an overall patron serving model, which promotes responsible serving via monitoring, training, and intervention. Managers acting on insights from BarVision results in reduced overpours, improved patron experience, and increased revenue.

Traditional programs used by Hotel F&B operators consist of training at the time of hire with limited oversight and minimal retraining. BarVision is an excellent tool for management to provide ongoing coaching and training for their bartenders.

WHAT TYPES OF HOTEL VENUES CAN BENEFIT?

With the development of BarVision's newest generation of hardware, the solution can be installed in conventional bars, liquor serving carts, used on pool decks, patios, golf courses, beer gardens, and more. Wherever alcohol is being consumed, BarVision can monitor and collect data on pouring. Only with BarVision can operators understand the overall performance of every bar station, bartender, or shift.

BarVision is raising the bar for best practices in serving alcohol.

BarVision reports what, when, and where every drink is poured and if it was accurately charged for. Bar & restaurant managers can remotely monitor bartender pouring and ensure guests are served quality, accurate, proper drinks with no oversight necessary.

- ✔ Dedicated Customer Success Advisors with F&B backgrounds deliver analysis and personalized insights to accomplish your organization's goals.
- ✔ Mobile solution allows pours to be monitored everywhere your guests are enjoying drinks.
- ✔ Pour monitoring allows management to verify staff performance and customer satisfaction.
- ✔ Simple, effective, and indistinguishable to staff and guests; BarVision's SmartSpouts monitor pours without restricting speed or adding steps in the process of making cocktails.
